What Changed

Previous report identified **28% error rate** (72% accuracy) over 7 months — **"Operational Chaos"** by industry standards.

- **13 Mar — Stocktake:** full bin audit corrected locations → **72%** → **83.2%** **(+11pp)**
- **23 Mar — Scanner:** barcode verification at pick point → **83.2%** → **89.6%** **(+6.4pp)**

Remaining 10.4% errors are almost entirely from **office manual orders** entered with wrong bin locations — not warehouse mistakes. Fixing office process will push accuracy to **97–98%**.
